

LALIZAS Release Hook LAR 36, SOLAS/MED/USCG

Automatic & manual operation in one hook for extra safety

The LALIZAS Release Hook LAR 36 is an off-load release hook, suitable for davit launched liferafts & rescue boats, with a davit load up to 3670 kg / 8091 lb.

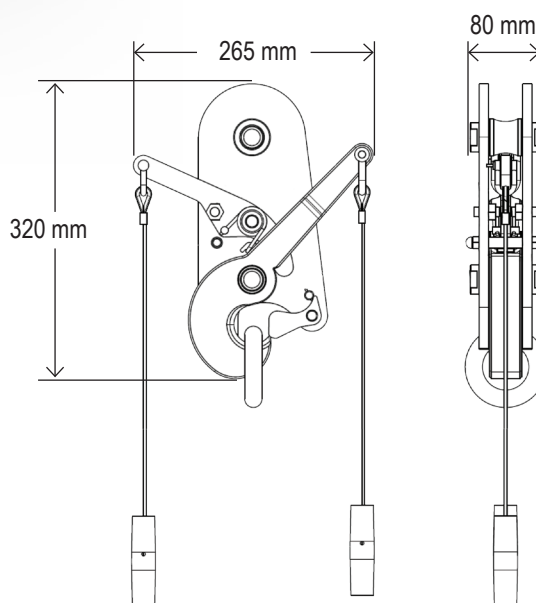

The two modes of operation allow for safe evacuation regardless of the conditions:

- **Automatic release mode:**
by activating the automatic release mechanism prior to splashdown, the hook will open automatically when the craft becomes waterborne.
- **Manual release mode:**
when the craft is waterborne, but has not been auto-released (due to added load on the hook while being towed or due to bad sea conditions), then the manual release mode must be activated by the user.

Remember that with this release hook, the actuating lever of the automatic release must be pulled prior to splashdown, for both automatic and manual release modes.

Dimensions

Specifications

Material	Inox 316 for high corrosion resistance
Safe Working Load (kg / lb)	36 kN (3670 / 8091)
Weight (kg / lb)	10 / 22.5
